🧠 SKILLS

- JavaScript
- React js
- Next Js
- Node js
- Express js
- MySQL/MongoDB (Database)
- HTML
- CSS
- Bootstrap
- Material UI
- Tailwind CSS
- Prime React
- Redux
- Leadership skill

📁 PROJECTS

- E-Commerce website with admin dashboard**
Utilizing React.js for the frontend, Node.js and Express.js for the backend, MongoDB for the database, and TypeScript for type safety and improved code quality.
Key Features: The dashboard is designed to manage various aspects of an e-commerce platform, including inventory management, order processing, customer data management, and analytics.
- TuchHut academy website**
Built using JavaScript for the frontend, React.js for interactive UI components, Node.js and Express.js for the backend server, and MongoDB for data storage.
Website Features: The website likely offers courses or educational content, with functionalities such as user registration, course enrollment, content delivery, and possibly a dashboard for users to track their progress.
- ClickNSend**
Utilizing a full JavaScript stack with React.js for the frontend, Next.js for server-side rendering, Node.js, Express.js for the backend, and Redux for state management ,providing a robust and efficient development environment
Delivery Features: ClickNSend likely offers functionalities such as order placement, real-time tracking, delivery status updates, and possibly integration with payment gateways for seamless transactions.

📜 CERTIFICATES

- Full stack web development**
From internshala (6 weeks)
I worked on dummy projects on this internship such as E-Voting Management System and Portfolio Website
